OutBack Transformer 

Product Name and Description	Part Number	Price
<b>FW-X240 - 4kVA 120/240 VAC Autotransformer</b> This auto-transformer is used for step-up, step-down or for generator balancing applications. Includes a 25 amp two pole breaker for manual control and overload protection of the transformer and wiring. For use inside FLEXware 500-AC or FLEXware 1000-AC	704264	\$399.00
<b>PSX-240 - 6kVA 120/240 VAC Autotransformer</b> This auto-transformer is the same as the X-240 except that it comes with an enclosure that includes a cooling fan and two 25 Amp AC breakers.	704322	\$539.00
<b>PSX-240-RELAY 6kVA rated Autotransformer with enclosure, cooling fan and relay assembly.</b> Required when split-phase stacking with 120/208VAC power sources. (Includes dual-pole 25 Amp AC breaker)	704580	\$599.00

Xantrex T-240 Transformer 

The T-240 transformer from Xantrex can be used in several ways; step-up, step-down or as a balancing transformer. Typical use of this transformer is to operate a 240 VAC well pump from a 120 VAC source like a single inverter. The other application for the T-240 transformer is to better balance the output of a 120/240 VAC generator feeding into a single 120 VAC inverter/charger. The T-240 has a 3400 VA continuous output at 25°C with a 12 W idle power consumption. The T-240 is mounted in an indoor-rated powder-coated steel enclosure with numerous 3/4 inch and 1 inch knockouts. Two year warranty. 46 lbs.
